PRODUCT INFORMATION

BMP-15 (Bone morphogenetic protein-15), Human

Catalog number	C01076-5UG / C01076-20UG / C01076-100UG
Package	5 µg / 20 µg / 100 µg
Description	Bone morphogenetic protein 15 is a protein, that in humans, is encoded by the BMP15 gene. It's mainly involved in folliculogenesis. The protein encoded by this gene is a member of the TGF- β superfamily. It is a paracrine signaling molecule involved in oocyte and follicular development. Using Northern blot analysis, BMP15 has been shown to be exclusively expressed in the ovaries. This protein may be involved in oocyte maturation and follicular development as a homodimer or by forming heterodimers with a related protein, Gdf9.
Source	Escherichia coli
Sequence	MAPLATRQGKRPSKNLKARCSRKALHVNFKDMGWDDWIIAPLEYEAFHCEGLC EFPLRSHLEPTNHAVIQTLMNSMDPESTPPTCCVPTRLSPISILFIDSANNVVYK QYEDMVVESCGCR with polyhistidine tag at the C-terminus
Endotoxin level	<0.1 EU per 1 µg of the protein by the LAL method.
Activity	Measure by its ability to induce alkaline phosphatase production by ATDC5 cells. The ED_{50} for this effect is <17 ng/mL.
Activity Purity	Measure by its ability to induce alkaline phosphatase production by ATDC5 cells. The ED ₅₀ for this effect is <17 ng/mL. >98% as determined by SDS-PAGE. Ni-NTA chromatography
Activity Purity Formulation	Measure by its ability to induce alkaline phosphatase production by ATDC5 cells. The ED ₅₀ for this effect is <17 ng/mL. >98% as determined by SDS-PAGE. Ni-NTA chromatography The protein was lyophilized from a solution containing 20 mM sodium citrate, 0.2 M NaCl, pH 3.5.
Activity Purity Formulation Reconstitution	Measure by its ability to induce alkaline phosphatase production by ATDC5 cells. The ED ₅₀ for this effect is <17 ng/mL. >98% as determined by SDS-PAGE. Ni-NTA chromatography The protein was lyophilized from a solution containing 20 mM sodium citrate, 0.2 M NaCl, pH 3.5. It is recommended to reconstitute the lyophilized protein in sterile H ₂ O to a concentration not less than 100 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient re-dissolved.
Activity Purity Formulation Reconstitution Storage	Measure by its ability to induce alkaline phosphatase production by ATDC5 cells. The ED ₅₀ for this effect is <17 ng/mL.

SDS-PAGE analysis of recombinant human BMP-15
