

PRODUCT INFORMATION

**Human Coronavirus (NL63) Nucleocapsid Protein,
His-SUMO tag, HEK293**

v. 230201

Catalog number	C11001-5UG / C11001-20UG / C11001-100UG
Package	5 µg / 20 µg / 100 µg
Description	Nucleocapsid protein (NP) packages the positive strand viral genome RNA into a helical ribonucleocapsid (RNP) and plays a fundamental role during virion assembly through its interactions with the viral genome and membrane protein M. NP also plays an important role in enhancing the efficiency of sub-genomic viral RNA transcription as well as viral replication. This product is composed of a DNA sequence encoding HCoV-NL63 NP and a polyhistidine-SUMO tag at the N-terminus.

Endotoxin level	<0.1 EU per 1 µg of the protein by the LAL method.
Purity	>90% as determined by SDS-PAGE. Ni-NTA chromatography
Formulation	The protein was lyophilized from a solution containing 1X PBS, pH 7.4.
Reconstitution	It is recommended to reconstitute the lyophilized protein in sterile H ₂ O to a concentration not less than 100 µg/mL and incubate the stock solution for at least 20 min to ensure sufficient re-dissolved.
Storage	Lyophilized protein should be stored at -20°C. Upon reconstitution, protein aliquots should be stored at -20°C or -80°C.
Note	Please use within one month after protein reconstitution.
